

PRO 7100 TRUCK

TomTom PRO 7100 TRUCK

Diversions, rerouting and size restrictions: every day your drivers face a bewildering number of challenges to get the goods through. Anyone can delay delivery – putting your drivers under pressure and leaving your customers dissatisfied. Slower, wider, heavier, taller, longer – route planning for bigger vehicles needs to be different. With the TomTom PRO 7100 TRUCK it is.

The PRO 7100 TRUCK uses smarter navigation to plan better routes for your drivers. They are less likely to get stuck, delayed or drive unnecessary distances – meaning efficient journeys and accurate scheduling.

Save time and fuel with the smartest routes

The TomTom PRO 7100 TRUCK gets your fleet to their destination across the whole of Europe (45), it takes into account:

- The lower speeds of trucks on all roads
- Sharp angles that trucks find difficult
- That trucks prefer left turns to right turns
- IQ Routes uses real speed data to calculate the fastest route for any time of day of the week

Additionally it routes around known access restrictions for weight and dimensions in: Austria, Belgium, Denmark, France, Germany, Hungary, Ireland, Italy, Luxemburg, Portugal, Spain, Sweden, Switzerland, The Netherlands, United Kingdom

And with TomTom Map Share™ you can make corrections to your maps adding height and weight restrictions to streets or block a road completely by yourself.

Keep your drivers safe

Driving with a navigation device is safer as it takes the stress out of route-finding and allows your drivers to focus on the road ahead. The TomTom PRO 7100 TRUCK keeps your drivers safe. It is packed with safety features like:

- Warns for restrictions and dead ends
- Avoid areas where the size of their vehicle might make maneuvering hazardous
- New user interface and capacitive Fluid Touch screen let's drivers pick to zoom in an out of maps, or scroll through menus with the tips of their fingers, needing less taps and allowing them to focus on the road
- Advanced Lane Guidance - to help navigate difficult junctions
- Text to speech - receive spoken instructions from the device for minimal distraction from the road ahead
